

Finance Resilience in New Markets

Prepare and price innovative risk transfer solutions in emerging markets.

Case Study:

Globally, catastrophic urban floods disproportionately affect communities, landscapes, and economies in regions without developed insurance markets.

Financing and engineering resilience in these huge emerging markets will require innovative new partnerships between insurers/reinsurers, NGOs, governments, and A/E/C. HazelFLOOD can accelerate resilience risk transfer and engineered solutions.

Build flood resilience where the risks are greatest.

Use HazelFLOOD to:

- Pressure-test cities and regions, digitally, to optimize investment in both green and grey flood infrastructures;
- Finance the delivery of infrastructures tied to insurance products;
- Tie risk and recovery financing to nature-based solutions;
- Offer new products based on flood resilience improvements.
